## Official 14 Team Double Elimination Bracket

V - Visiting Team  
H - Home Team  
After Round 4 flip a coin for home team.

- After round 4, only one bye per round is permitted, and that is only when an odd number of teams remain alive.
- In this double elimination tournament, no team may receive a second bye, until all teams alive have had one bye.
- In each round after round 4, the Winner Game #19 gets first choice on byes if they have not already had one bye or if everyone remaining has had a bye. Otherwise the losers that have not had a bye draw for the bye.
- In each round after round 4, the even number of teams left after the bye has been drawn, if there is one, will play. There will be an open draw for opponents unless such a draw matches teams against each other for the second time, in which case the schedule that matches the fewest teams against each other a second time will be chosen. However, in each round the draw for the bye, if there is one, will always come first, and is more important than playing a team a second time.
